SUMMARY

Full Stack Software Engineer with nearly 3 years of experience building production-grade web applications using React.js, Next.js, Node.js, NestJS, TypeScript, PostgreSQL, and MongoDB. Experienced in legacy modernization, backend architecture, REST APIs, and AI-powered features for enterprise SaaS platforms.

WORK EXPERIENCE

Software Developer Engineer I – Genboot Private Ltd.

Aug 2025 – Present

- **ChicksFlow (TypeScript • Supabase • PostgreSQL • Edge Functions • ERP • Payments)**
 - Led the backend modernization of a production-grade booking and order management platform.
 - Refactored core backend modules to improve scalability, maintainability, and data integrity.
 - Strengthened booking, payment validation, and ERP workflows while ensuring uninterrupted production operations.
- **Sydkik (React.js • Node.js • Express.js • MongoDB • HelpScout)**
 - Owned the end-to-end development of the Sydkik Admin Panel across frontend, backend, and client collaboration.
 - Developed user management, subscriptions, event logs, and real-time escalation workflows.
 - Integrated HelpScout to streamline customer support and improve operational efficiency.
- **Hexalytics (NestJS • PostgreSQL • Cron Jobs • Email Automation)**
 - Engineered trigger-based email workflows for Redington CQ 2.0 using dynamic templates and role-based recipient logic.
 - Built cron-driven notification services and integrated multi-platform mailing to automate business communication.

Software Developer Engineer I – Nuclay Solutions Private Ltd.

Sept 2023 – Aug 2025

- **GiveCentral (React.js • Node.js • Express.js • MySQL • Jest • GitLab CI/CD)**
 - Migrated a 10-year-old legacy PHP application to a modern MERN architecture as part of a 3-member engineering team.
 - Analyzed legacy workflows, resolved production issues, and ensured seamless feature parity during migration.
 - Built unit and integration tests using Jest and automated testing, builds, and deployments using GitLab CI/CD.
